

MANAGE FLOW

Use your board and the data it generates to identify and iteratively remove impediments to work flowing smoothly through your system.

LIMIT WORK IN PROGRESS

Focus your efforts on fewer things at a time to ensure a faster flow of higher quality results to your customer.

KANBAN PRINCIPLES

VISUALIZE THE WORKFLOW

Make your up-to-date work & workflow visible to the team and its stakeholders at all times.

IMPROVE COLLABORATIVELY

Work together to improve continuously, with a laser focus on your results as a team rather than individual efforts.

MAKE PROCESS POLICIES EXPLICIT

Build your standards into the way you do work, rather than bury them in documents. Make doing the right thing obvious and easy.
